

ASSIGNMENT-5

Curves overview. In the Curves adjustment, you adjust points throughout an image's tonal range. Initially, the image's tonality is represented as a straight diagonal line on a graph. When adjusting an RGB image, the upper-right area of the graph represents the highlights and the lower-left area represents the shadows

Camera Raw is Adobe's RAW image-processing engine. It's what allows you to convert the RAW image files shot by your camera into widely supported, shareable, usable JPGs.
